

Voice to Email

Features:

- Create your own bespoke service
- Record your own prompts
- Capture multiple data input
- Useful message repeat option
- Instant email delivery of data
- Capacity for high volume of calls

'Voice to Email' allows you to create your own multi-purpose data capture service, requesting the caller to either record a voice response or by using the telephone keypad (DTMF) to make an entry.

ICS are a leading provider of inbound telecoms solutions, specialising in telemarketing numbers and IVR-based call handling. With years of experience in the market you can be assured that we'll provide you with a service second to none. Whether a simple one-line application or a complex interactive service, we will manage it leaving you to focus on what you do best.
